NOV 24 1952

The Honorable Matthew V. Neely
United States Senate
Washington 25, D. C.

Dear Senator Neely:

Thank you for your letter of 15 November 1952, with which you enclosed the application of [redacted] for employment with this Agency.

[Redacted] application has been referred to our Personnel Office, and you may be assured that it will be given careful consideration. As soon as a determination has been made as to whether there is a suitable vacancy for him at this time, we shall be glad to let you know.

Your interest in the Central Intelligence Agency is greatly appreciated.

Sincerely,

For the first time, the *Journal of the American Medical Association* has published a report of a study that found no significant difference in the effectiveness of two different types of antihypertensive drugs. The study, conducted by the National Institute of Arthritis and Musculoskeletal and Skin Diseases, found that the two drugs, propranolol and reserpine, were equally effective in reducing blood pressure in patients with hypertension. The results of the study are published in the May 10 issue of the *Journal*.
